## Random Carton Sealing Machine

### Side belt drive with guards

This semi-automatic carton sealer uses a top and side drive system which makes this machine ideal for use in most normal carton sealing environments. The top and side belt drives ensure the carton is pulled through the tape heads efficiently and effectively.

Size adjustments for height and width are made manually. The machine simultaneously seals both the top and bottom flaps of cartons. It has variable tape heads ranging from 48mm through to 72mm tape width. The Omni 310 will output up to 20 metres per minute per tape head.

Specifications	Result
Machine size	L1154mm×W1000mm×H(table height+840mm)
Table height	550mm~750mm (adjustable)
Conveyor speed	19 metres per minute
Power supply	1P, AC110V/220V, 50Hz/60Hz, 600W
Carton dimensions	L(150~∞)mm, W(120~480)mm, H(120~450)mm
Net weight	240kg
Tape type	Adhesive tape (48~72)mm (kraft or BOPP tape)
Carton dimensions	L(150~∞)mm, W(120~480)mm, H(120~450)mm
Compressed air	Yes

#### Features:

- Fast & efficient
- Sturdy steel construction
- Industrial wheels for easy mobility
- Easy to use control panel
- Service friendly machine, easy access to all required part.
